

Facial Recognition for Casinos

Casino security and surveillance have become more complex as both risks and available technologies have grown. Venues like yours must balance guest experience with compliance and crime mitigation — and the fines, suspensions, and reputation impact that come along with them. Facial recognition is the future, enabling your casino to remain vigilant and respond to risks swiftly.

Facial Recognition Aids in Casino Safety, Security, and Customer Experience

eConnect empowers casinos to stop fraud and IT security breaches with best-in-class facial recognition software. Our platform integrates with all systems — from video and casino management systems to cage, credit, and loyalty systems — to protect your venue

AI-powered eConnect software brings new life to your security investment, safeguarding your customers and casino as you enhance top-line performance with tools such as:

[eClear® ID Scanner](#)

to verify ages and IDs across your venue to maintain compliance

[eClear® Access Control](#)

to streamline the entrance to get patrons and employees where they need to go

[ID|Connect](#)

to maintain a real-time database of bad actors, enabling you to share intelligence across the industry

How eConnect Stands Apart from the Competition

eConnect is the only facial recognition solution that's 100 percent focused on gaming and hospitality, so it's built to suit your specific needs. We are licensed in all jurisdictions and have a proven track record of providing end-to-end security solutions that integrate across all systems.

Our facial recognition does the hard work to prevent theft, fraud, money laundering, and other crimes in real time, enabling your security and surveillance teams to stop smaller problems from becoming bigger ones. And at every turn, you have access to a team of experts who provide the highest level of support and training.

About eConnect

eConnect is an award-winning facial recognition software company with a proven track record of providing end-to-end security solutions with AI technology. Used by 400+ satisfied customers across the casino and hospitality industry, our technology integrates with all major security systems to identify risks in real time, helping to not only secure your venue but also enhance customer experiences.

Stop fraud and reduce criminal activities before they start with the power of facial recognition and data analytics. Get in touch today to request a quote or book a demo to find your right-fit solution.
